VISUAL ANALYTICS INTRO

S. Rinzivillo – rinzivillo@isti.cnr.it

WHO I AM?

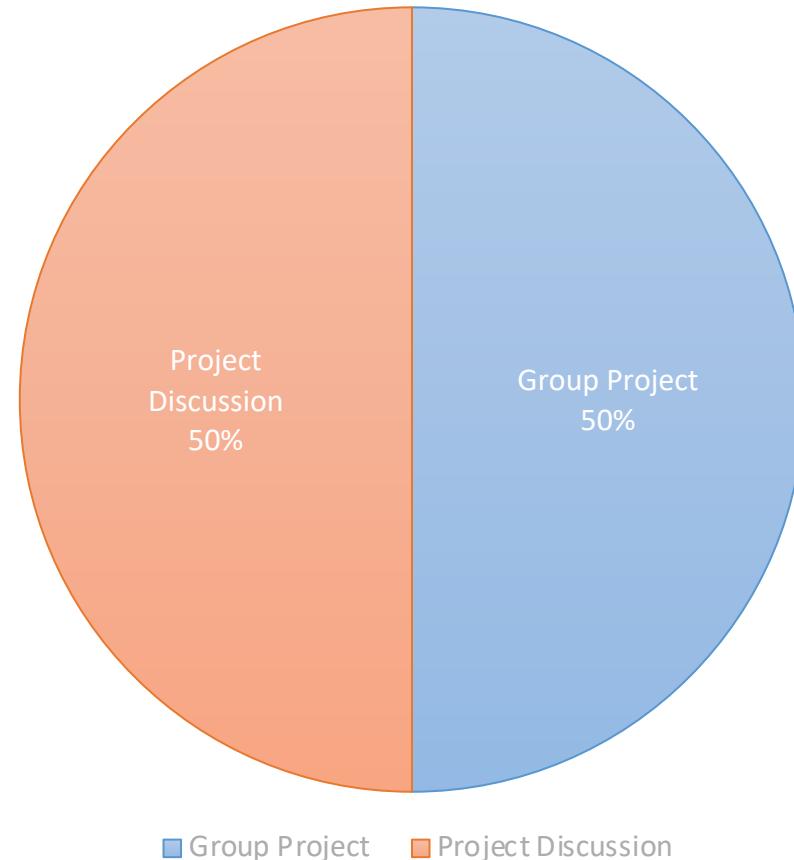

- Salvatore Rinzivillo
 - rinzivillo@isti.cnr.it
- Page course: <http://didawiki.cli.di.unipi.it/>
 - Visual Analytics
- Github page:
 - <https://github.com/va602aa-master>
- Telegram channel:

SCHEDULE

- On Monday
 - 16:15 to 18:00
- On Wednesday
 - 16:15 to 18:00

GRADING

- Project (50%)
 - Up to 2 persons per group (!)
- Project discussion (50%)
- Project topic
 - Multidimensional exploration of a dataset
 - One (or two) dataset(s) assigned for all
 - Specific proposal may be discussed

PROJECT FEATURES

- A project should have the following requirements:
 - The application should contain **multiple visual widgets**, each providing insights on a selection of dimensions of the original data
 - It is possible to use state-of-the-art charts (bar charts, line charts, etc.) and libraries (plotly, vega, etc). It is should implement a **novel, original visualization** to present the data in a creative, non-trivial way. (see examples on Vast Challenge 2008 developed in class)
 - **Interactivity** should be implemented, providing toolbars, selections and filters for the data.
 - The visual widget should interact among them, realising a set of **linked display** to browse the data across multiple dimensions

BOSTON SUBWAY SYSTEM

<http://mbtaviz.github.io/>

Service starts at 5AM on Monday morning. Each line represents the path of one train. Time continues downward, so steeper lines indicate slower trains.

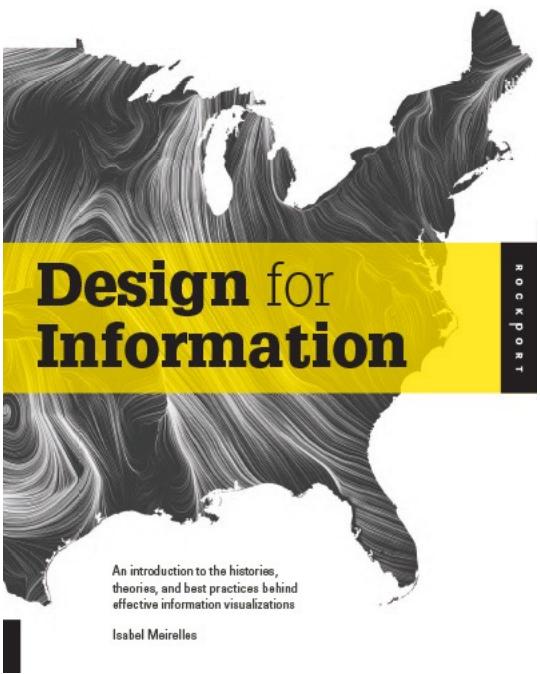

Since the red line splits, we show the Ashmont branch first then the Braintree branch. Trains on the Braintree branch "jump over" the Ashmont branch.

Train frequency increases around 6:30AM as morning rush hour begins.

DATA VISUALIZATION AND VISUAL ANALYTICS

INTRODUCTION

VA - CRASH COURSE

- Effective Visual Representation
 - Vision System
 - Visual Variables
- Toolbox – Bootstrap, Node.js, Vue.js, crossfilter.js
- Toolbox – Base visualizations (Plotly.js, Vega, DC.js)
- Toolbox – D3.js
 - Basics
 - Charts
 - Advanced Visualization
- Scientific Visualization
 - Plotting
 - Geography
- Storytelling

DATA VISUALIZATION

Convey Information through
graphical representation of data

MOTIVATIONS

- Data everywhere
- No value for raw data
 - Need to extract valuable information
- **Information overload:**
 - Irrelevant for current task
 - Processed in an inappropriate way
 - Presented in an inappropriate way

VISUALIZATION GOAL

- Record Information
 - Sketches, photographs, ECG,...
- Analyze data to support decisions (**exploration**)
 - Create and verify hypotheses
 - Identify Patterns
 - Identify Outliers
- Communicate (**explanation**)
 - Share or highlight insights on data
 - Persuade

ANALYZE: ANSCOMBE'S QUARTET - PROPERTIES

| Property | Value |
|--|---|
| Mean of x in each case | 9 (exact) |
| Sample variance of x in each case | 11 (exact) |
| Mean of y in each case | 7.50 (to 2 decimal places) |
| Sample variance of y in each case | 4.122 or 4.127 (to 3 decimal places) |
| Correlation between x and y in each case | 0.816 (to 3 decimal places) |
| Linear regression line in each case | $y = 3.00 + 0.500x$ (to 2 and 3 decimal places, respectively) |

Over the Decades, How States Have Shifted

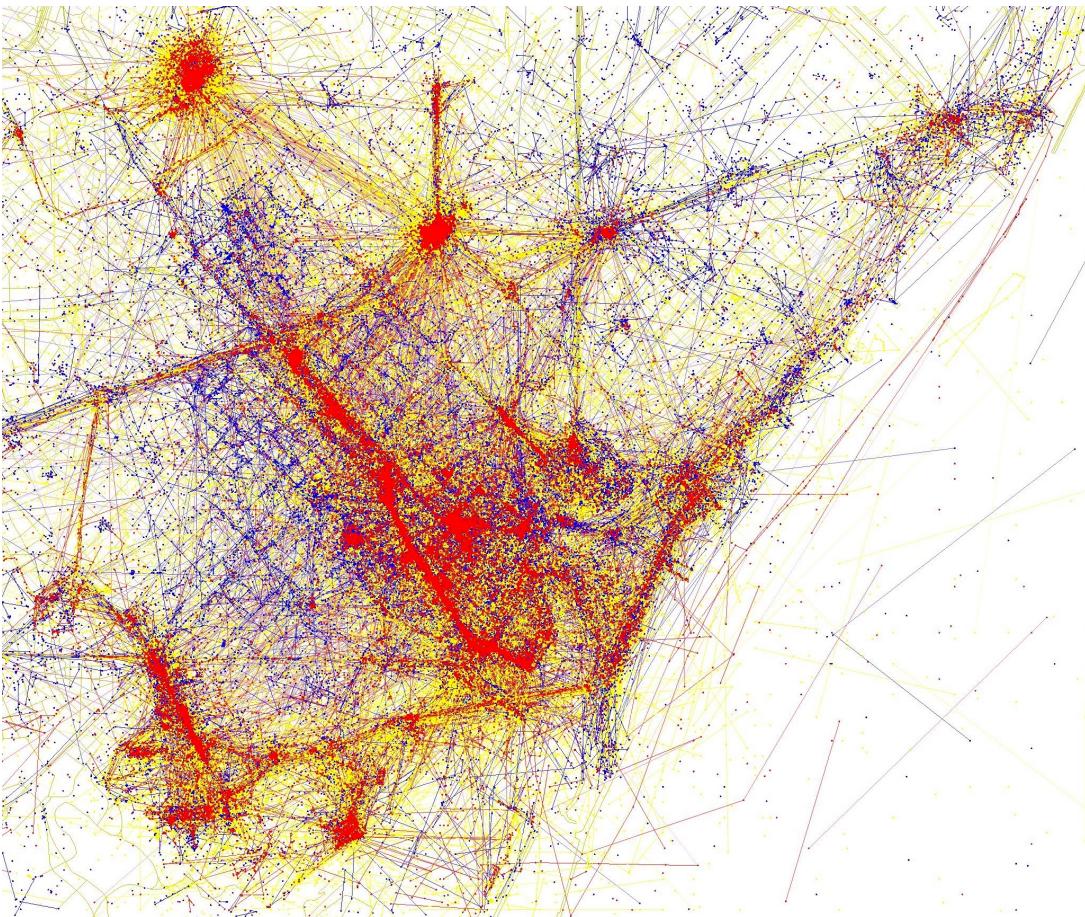

Recent elections have placed a heavy emphasis on "swing states" — Ohio, Florida and the other competitive states. Yet in the past, many more states shifted between the Democratic and Republican parties. A look at how the states stacked up in the 2012 election and how they have shifted over past elections.

Each box represents a state sized by number of electoral votes.
Each curve shows how much it shifted left or right between elections

VISUALIZATION AND VISUAL ANALYTICS

- Make data and information processing transparent
- Combine strengths of humans and computers

**Computers are
incredibly fast,
accurate,
and stupid;
humans are
incredibly slow,
inaccurate
and brilliant;
together
they are powerful
beyond
imagination.**

datavizualization.ch

The screenshot shows the homepage of datavizualization.ch. It features a main banner with a colorful bar chart titled "How We Created Color Scales". Below the banner are several news cards: "Visualizing Substratum" (February 17, 2014), "Interactively Explore the YOLO Flip" (February 12, 2014), and "The Daily Routine of People" (3 days ago on Tumblr). The sidebar includes sections for "RECENT", "POPULAR", "INTERVIEW", and "ELSEWHERE". A "COMMENTERS" section at the bottom right lists "Hans Rosling", "Don't be afraid to download it", and "I know I can do".

NYT's The Upshot published their precinct-level map of 2020 election results. Zoom in to your geographic area and bask in or scratch your head over the detailed variation.

This seems to be a recurring view now, with their "extremely detailed map" making an appearance after the 2016 and 2018 election. They also had their "most detailed maps" in 2014.

However, this year, The Upshot made their precinct-level data available on GitHub, so you can look closer if you like.
